

## Follow Your Goals Through.

*"PurePeak - Empowering your business by promoting advanced, simple, pleasant and safe technology"*

PurePeak is a technologies company specializing in high-end multi-tiered next-generation networking and network monitoring systems.

Today's IT systems and communications infrastructure make the core activity of all modern organizations, and allow them to compete in the challenging business world.

All organizations deploy, in their sites around the world, numerous computer systems and communications services from a variety of vendors.

PurePeak's comprehensive solutions deliver fully redundant and scalable networks, monitored and controlled by advanced systems to ensure optimal reliability and performance.

PurePeak provides its customers with the ability to have all parts and components of the core of their organization under control, anytime and from anywhere.

PurePeak's management team consists of leaders in the communications industry, with vast experience in management and operation of sophisticated large-scale projects.

The combination of the vision and the high-end technical skills have merged together to achieve PurePeak's mission to empower

businesses by promoting advanced, simple, pleasant and safe technology.

PurePeak specializes in the following fields:

- High-end Network Optimization. In terms of resiliency, redundancy and performance, maximizing current resources while cutting down operational costs.
- Design and Deployment of Network Monitoring Systems. Real-time and long-term network monitoring systems, anomaly behavioral pattern recognition, and logging data collection and analysis systems.
- Remote Network Monitoring Services. Network monitoring services for SMEs to remotely health-check and evaluate mission critical systems and services.
- Managed Services Design and Deployment. Complete turn-key solutions for service providers in multi-tiered next-generation networks, that enable to increase average return per user.
